\*\*Support must be requested by email. If necessary, emails may arrange a time for a Skype chat or voice call. All support provided in English between 9AM - 5PM US Eastern time.

\*\*\*Contact us for special pricing on Student License orders of 10,000 or greater.

*English Proficiency Levels*

CELLA Online provides results using four English proficiency levels, including Beginning, Low Intermediate, High Intermediate, and Proficient. CELLA Online proficiency levels take into account students' particular grade, Kindergarten through grade 12. In addition, proficiency levels are adjusted for Fall, Winter, or Spring administration. Scale scores and a variety of diagnostic reports are also available.

*Bulk Purchase*

A CELLA Online bulk purchase consists of a full academic year license providing for a specified number of students within a school or district. Districts have the option of administering multiple assessments to students during the period of the license, such as for charting progress within a school year or tracking changes in diagnostic reports. Purchase of a larger number of student licenses results in a lower price. The cost includes all CELLA Online tests and applicable Orientation/Training and Support, depending on this size of purchase. Up to 10% of any unused student accounts may be rolled over into the following academic year. Student accounts are considered "used" when a student name is entered or uploaded into the system.

*Additional Orientation/Training/Support*

Beyond the training and support included with bulk purchases, additional training and support may be purchased in hourly increments:

Additional orientation/training: \$150/hour.

Additional tech support: \$65/hour.
